DETAILED ACTION

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Edward Fan, Reg. No. 56,493 on March 1, 2010.

Claim 20 is amended as follows:

In claim 20 lines 5-6, the term "each of said other nodes" has been changed to --- each other node ---;

Claim 37 is amended as follows:

In claim 37, the beginning term "A computer readable medium for storing a set of programming instructions" has been changed to A computer readable medium, non-transitory storage medium, for storing a set of programming instructions ---.

Claims 64-66, 72-75, 77-81, 84, and 86-89 are canceled.

Allowable Subject Matter

2. Claims 20-34 and 37-56 are allowed.

Regarding claims 20-34, the prior art, in single or in combination, fails to teach “a self-organizing network comprising: (a) a plurality of nodes; (b) at least one link interconnecting neighbouring ones of said nodes; (c) each of said nodes being operable to maintain information about each other node that is within a first portion of said nodes, said information including: (i) a first identity of another one of said nodes within said first portion; (ii) for each first identity, a second identity representing a neighbouring node that is a desired step to reach the said another one of said nodes respective to said first identity; (d) each of said nodes being operable to maintain a third identity representing a neighbouring node that is a desired step to send a request for information about said nodes in a second portion of said nodes that is not included in said first portion, wherein said third identity is determined based on which of said neighbouring nodes most frequently appears in each said second identity” in combination with other limitation of the claim(s).

Regarding claims 37-56, the prior art, in single or in combination, fails to teach “a computer readable medium, non-transitory storage medium, for storing a set of programming instructions for execution by, or on behalf of, a node forming part of a self-organizing network having a plurality of other nodes and at least one link interconnecting neighbouring ones of said nodes; said programming instructions for causing a computing apparatus within said node to maintain information about each of said other nodes that are within a first portion of all of said other nodes, said information including: (a) a first identity of another one of said nodes within said first portion; (i) for each said first identity, a second identity representing a neighbouring node that is a

desired step to reach the said another one of said nodes respective to said first identity; said programming instructions for further causing said computing apparatus to maintain a third identity representing a neighbouring node that is a desired step to send a request for information about said nodes in a second portion of said nodes that are not included in said first portion; and wherein said third identity is determined based on which of said neighbouring nodes most frequently appears in each said second identity” in combination with other limitation of the claim(s).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to WEI ZHAO whose telephone number is (571)270-5672. The examiner can normally be reached on Monday-Thursday, 8:00am-5:00pm.
